

CALIS Network Consulting

Want to efficiently network your office computers?

At CAL Internet Services, Inc., we provide **custom solutions** for your Internet and networking needs with our **knowledgeable** and **experienced** staff. CALIS offers support for **Windows** networks as well as **Linux** systems.

CALIS Network Consulting saves you money!

The professional staff at CAL Internet Services, Inc. will recommend the best customized options for your company so that you have a reliable network solution that works for your situation. From two computers to 2000 computers, we'll design a plan that will help your office run flawlessly!

In today's computer world security is at the top of everyone's mind. CAL Internet Services will ensure your system is secure and will keep it updated to minimize any risks.

Our staff will also troubleshoot problems you may be encountering and give you a maintenance plan to keep your network running smoothly.

CAL Internet Services specializes in installation, administration, service and support of computer network solutions to small and medium sized businesses. CALIS is committed to giving your company network administration cost reduction, focused product knowledge and professional quality solutions.

CAL Internet Services' ultimate goal is to increase the stability of your computer network using our network management formula. Through analysis, evaluation, configuration techniques and documentation we hope to reduce your support overhead requirements. When using CALIS network consulting, your company should realize a reduction in billable hours over the course of a year.

Efficient Network Consulting.

When you select CAL Internet Services, Inc. for your network consulting needs, you can count on us to provide you with the most cost-effective solution for your business. You will never see us suggest a solution that you won't need or can't reap benefits from. You can also count on us to deliver your solution on time.

We take pride in giving the best possible support to our customers from start to finish. When contacting our support team you can count on a patient, responsive and knowledgeable staff.

Ultimately your office will be provided with an efficient, safe and reliable network that should result in a long-term reduction to your bottom line expenses.

"Since we've been using CAL Internet Services the customer service has been exemplary...they provide a solid, easy to use service and truly strive to make any communication with their representatives a positive one, from the owners to the technicians."
